

AMEE BRAHMBHATT

Senior .NET Developer | SQL Server DBA | Backend & API Architecture

Ahmedabad, Gujarat, India · Brahmhattami7@gmail.com · +91 81418 02828 · linkedin.com/in/brahmbhatt-ami-42615618b

PROFESSIONAL SUMMARY

Results-driven **Senior .NET Developer** and **SQL Server Database Administrator** with **7+ years** of experience designing and optimizing enterprise-level backend systems using Microsoft .NET technologies. Deep expertise in **ASP.NET MVC**, **.NET Core (.NET 6/7/8)**, **RESTful API development**, and SQL Server administration including backup, recovery, performance tuning, and indexing. Proven track record delivering scalable HRMS, E-Commerce, and Healthcare solutions. Experienced in DBA leadership, mentoring junior developers, AI workflow integration, and Agile delivery.

CORE COMPETENCIES

REST API Development · SQL Server DBA · Database Performance Tuning · Stored Procedures & Indexing · .NET Core / ASP.NET MVC · Entity Framework · Clean Architecture · SOLID Principles · RBAC · Healthcare IT · AI Workflow Integration · Backup & Recovery · Agile / Scrum · Code Review & Mentoring · Production Support

TECHNICAL SKILLS

Backend	ASP.NET MVC, ASP.NET Web API, .NET Framework, .NET Core (.NET 6/7/8), Entity Framework, LINQ, REST APIs, Dapper
Languages	C#, SQL, TypeScript
Database & DBA	SQL Server, Stored Procedures, Functions, Triggers, Query Optimization, Execution Plans, Performance Tuning, Indexing, Backup & Recovery, DB Design & Normalization
Architecture	Clean Architecture, N-Tier, Repository Pattern, Dependency Injection, SOLID, Design Patterns, Microservices
Security	JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC), API Security, Data Encryption
Tools	Visual Studio, SSMS, Postman, Swagger / OpenAPI, Git, GitHub, Jira
Methodologies	Agile, Scrum, SDLC, Code Review, Unit Testing, Requirement Analysis, Production Deployments
AI Tools	GitHub Copilot, Cursor AI, ChatGPT, Claude AI, AI Workflow Integration

WORK EXPERIENCE

Senior Software Developer / Database Administrator — Technobrainz IT

Solution

Jun 2018 – Present | Ahmedabad, India

- Led end-to-end backend development of enterprise applications using ASP.NET MVC, .NET Core (.NET 6/7/8), and SQL Server across HRMS, E-Commerce, and Healthcare domains.
- Served as **Lead DBA** — managing full SQL Server lifecycle: database design, backup strategies, disaster recovery, security hardening, and ongoing performance tuning.
- Designed and implemented scalable **RESTful APIs** enabling seamless enterprise integrations and third-party service connectivity.
- Optimized complex SQL queries, stored procedures, and execution plans — achieving measurable gains in query throughput and system responsiveness.
- Implemented **RBAC** and **JWT-based authentication** across enterprise applications to ensure secure, structured data access.
- Integrated AI-powered tools and intelligent workflow automation into healthcare applications, streamlining clinical processes and reducing manual intervention.
- Mentored junior developers through code reviews and pair programming — improving team code quality and delivery consistency.

- Managed production deployments, monitoring, and incident resolution to maintain high availability across mission-critical systems.

KEY PROJECTS

TCW – Human Resource Management System (HRMS) | *ASP.NET MVC · SQL Server · Entity Framework*

- Developed enterprise-grade HRMS backend supporting recruitment workflows, attendance tracking, payroll processing, and leave management for large organizations.
- Architected MVC modules with clean separation of concerns; designed and optimized stored procedures, indexes, and SQL queries for high-volume employee datasets.
- Implemented RBAC, automated workflow validation, and approval chains ensuring data integrity and department-level security compliance.

GINA – E-Commerce Platform | *.NET Core · SQL Server · REST APIs*

- Built scalable backend modules for product catalog, inventory, and order processing using .NET Core with clean architecture and dependency injection.
- Designed RESTful APIs for payment gateway and logistics integrations; optimized SQL Server indexing and execution plans for high-traffic performance.

Healthcare Management Platform | *.NET Core · SQL Server · AI Tools*

- Building enterprise healthcare backend responsible for full DBA lifecycle — schema design, query optimization, backup strategies, and production administration.
- Designed secure REST APIs (JWT + RBAC) for patient records, appointments, and clinical reporting; integrated AI automation to reduce manual data entry.
- Managing production deployments and incident resolution for a mission-critical healthcare system with high-availability requirements.

EDUCATION

Master of Science (M.Sc.) — Information Technology | Jun 2016 – May 2018

ACHIEVEMENTS & RECOGNITION

Best Performer Award – Q4 2023 (Technobrain IT Solution): Recognized for consistently delivering high-quality solutions, leading performance optimization initiatives, and measurable contributions across multiple enterprise domains. Led healthcare platform DBA operations end-to-end — single-handedly managing database design, optimization, and production administration for a mission-critical system.

Mentored multiple junior developers, raising team-wide code quality standards and accelerating onboarding timelines.
